

Save Longstone Edge

The battle continues...

Calver High Street - 2006

"The risk of serious devastation
is greater than ever..."

2008?

www.longstone-edge.org.uk

Without your help
this will happen!

The mythology is that "it's all been stopped"

View from Curbar -
2006

More examples of wishful thinking:

- *The government has it sorted*
- *The PPA has it under control*
- *The planning process has prevailed*
- *The problem has gone away*

(Reality Check
over the page)

Curbar - 2008?

Froggatt - 2008?

This un-retouched photograph was taken on Longstone Edge on 12th August 2006

National Park or Industrial Wasteland?

It's not just about Backdale!

Over 400 acres are potentially at risk...

Reality check:

- It's only a ***temporary*** Stop Notice
- Backdale is only 10% of the problem
- Little faith in the planning or judicial routes stopping it completely
- Government-funded revocation is the only possible solution
- ***Will require massive public pressure***
